

A holistic approach to student safeguarding and wellbeing

Impero well:being provides cloud-based keyword detection tools to capture, record and identify early warning signs of harmful online behaviour. Combined with **Impero back:drop's** free digital safeguarding tools, **Impero well:being** allows schools to effectively manage and record both online and offline safeguarding concerns from a single, secure interface – creating a holistic view of every student's wellbeing.

Identify vulnerable students and intervene early with keyword detection

As students are adapting to spending more time online due to remote learning, schools need to identify the potential warning signs of at-risk behaviour in online environments. Created with global experts and charities, **Impero well:being** uses real-time keyword detection and captures to provide school staff with “who, what, when and why” information, so schools can understand the context of the situation, raise concerns about troubling behaviour, provide support to students and intervene when necessary.

Keywords of harmful content include:

Understand early warning signs & trends of school online behaviour

Alone, a keyword capture may not tell the full story. But when paired with other captures and concerns, keyword captures can provide valuable information to identify vulnerable students. **Impero well:being** provides granular reporting tools to identify areas of concern at a student, year group, school-wide or even MAT level. With full MIS integration, reporting can be filtered down to include student characteristics like class and gender.

Supporting safeguarding requirements of OFSTED and KCSiE

Impero well:being provides the tools you need to meet your safeguarding requirements under OFSTED and the DfE's Keeping Children Safe in Education guidance.

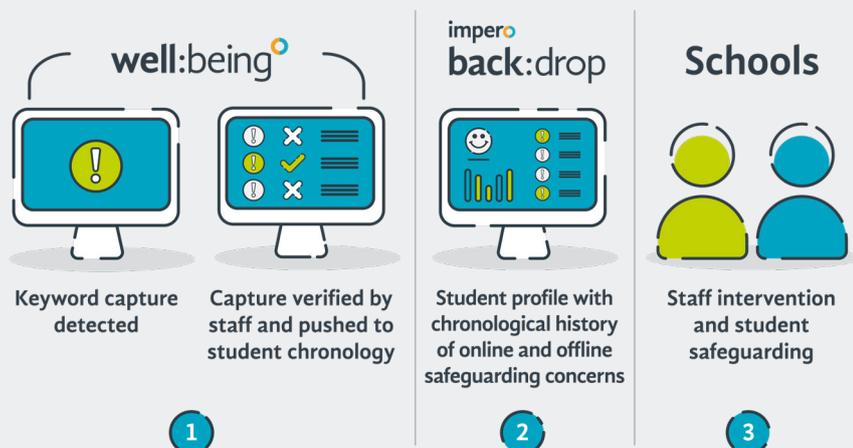

- An appropriate monitoring solution
- Supports evidence-based safeguarding compliance
- Safe and secure platform to record safeguarding concerns
- Simplifies referrals with external agencies such as CAMHS
- Audit-based, fully court-admissible records

impero back:drop

A full view of every student's wellbeing

When it comes to student wellbeing, online activity and offline must be understood together. That's why **Impero well:being** is accessed via **Impero back:drop**, so that online and offline concerns are combined into a single interface, pulling together pastoral, child protection, behavioural and mental health issues with online concerns.

Together, **Impero well:being** and **Impero back:drop** build a full history of a student's safeguarding history, helping schools protect students from online and offline harm and intervene quickly if a problem arises.
