

## A holistic approach to student safety and wellbeing

**Impero well:being** provides cloud-based keyword detection tools to capture, record and identify early warning signs of harmful online behavior. Combined with **Impero back:drop's** free digital safeguarding tools, **Impero well:being** allows schools to manage and record student concerns in online and offline environments from a single, safe and secure interface – creating a holistic view of every student's wellbeing.

## Identify vulnerable students and intervene early with keyword detection

As students are adapting to spending more time online due to remote learning, schools need to identify the potential warning signs of at-risk behavior in online environments. Created with charitable organizations and non-profits from around the globe, **Impero well:being** uses real-time keyword detection and captures to provide school staff with “who, what, when and why” information, so schools can understand the context of the situation, raise concerns about troubling behavior, provide support to students and intervene when necessary.

### Keywords of harmful content include:

## Understand early warning signs & trends of school online behavior

When paired with other captures and concerns, keyword captures can provide valuable information to identify vulnerable students. **Impero well:being** provides granular reporting tools to identify areas of concern for an individual student, grade level, school, or district. With full SIS integration, **Impero well:being** allows schools to analyze trends specific to student characteristics like grade level and gender.

## Easy-to-use, secure solution built specifically for schools

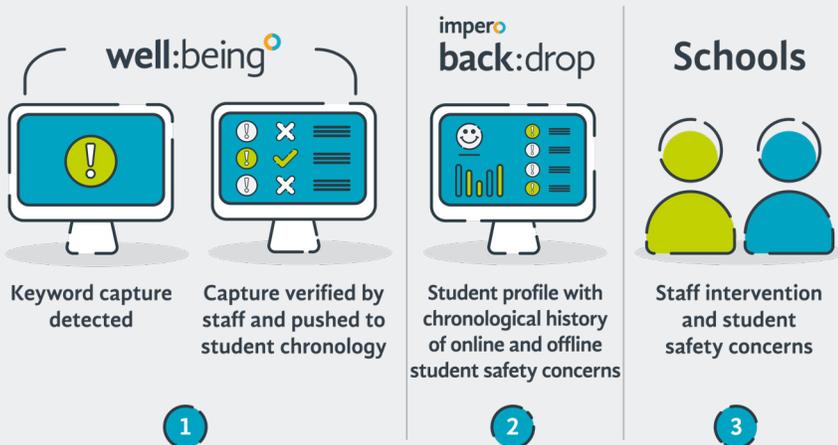

**Impero well:being** keeps student and staff information safe and secure in one central location. Schools can set permission levels for staff, and can view a time-stamped audit log of staff activity for additional security.

# impero back:drop

## A full view of every student's wellbeing

When it comes to student wellbeing, online activity and offline activity create a full picture of a student's health. That's why **Impero well:being** is accessed via **Impero back:drop**, so that online and offline concerns are combined into a single interface, helping schools draw any connection between a student's first aid, mental health, and behavioral issues with online behavior.

Together, **Impero well:being** and **Impero back:drop** build a full picture of a student's health, helping schools protect students from harm and intervene quickly if a problem arises.
