

# Efficient and flexible remote access software for highly secure organizations

Impero Connect is the market-leading remote support software designed to suit the specific needs of any business.

Impero Connect offers cutting-edge enterprise remote access solutions configured to secure the most complex IT environments, ensure compliance standards and increase the efficiency of businesses from anywhere in the world.

Impero Connect is used by **half of all Fortune 100 companies, nearly a third of Fortune 500 companies and 60% of the Financial Times' list** of largest companies in Europe.

Impero's goal is to help companies connect with confidence to any device, platform, server or network via its Connect software, the fully customized, secure solution that meets the needs of any business.

## Industries

Although Impero Connect can be configured to suit the needs of most organizations and accommodates a wide range of verticals, it is the preferred remote access solution in retail, finance, healthcare, manufacturing and other regulated industries.

**Impero's remote access software is scalable to every business size**, large or small, no matter the stage of development.

## Benefits of using Impero Connect

### Increased efficiency

Impero Connect increases support efficiency by significantly improving incident resolution time, effectively distributing information across an organization and consolidating the most important tools into a single, easy-to-use interface.

### Superior security

Impero Connect has cutting-edge security features built in, such as full end-to-end encryption, robust user access management and 2-factor authentication. Moreover, Impero's remote access solution exceeds security and compliance standards set forth by PCI DSS, HIPAA, GDPR and other frameworks.

### Flexible connectivity & cross-platform capability

Impero Connect allows connections to Windows, Mac, Linux, TCxSky and other POS and device platforms. Support is offered for more than 40 different versions of Mac, Windows, Linux, Android & iOS operating systems.

### Personalized support

Impero's purpose is to keep remote access systems fully optimized and support teams up and running effectively as soon as possible.

#### Multi-Platform Support

#### Deployment Options

#### Compliance Across the Board
