

The Portal VPC provides an isolated, single-tenant cloud environment dedicated to the Impero Connect Portal. Configured as an extension of your corporate data center, the Portal VPC is a managed network segment that offers seamless connectivity for all your users and devices.

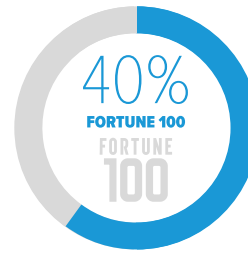

Benefits

With Impero Connect Portal VPC, you won't need to setup and manage complicated environments or maintain dedicated hardware and software. Focus on what makes your business unique and let Impero provide you with a centralized remote control solution.

- ✓ Security
- ✓ Scalability
- ✓ Resiliency
- ✓ Redundancy
- ✓ Reliability

Technology

Impero Connect is used by 40% of the Fortune 100 in the US and 60% of the Financial Times list of the largest companies in Europe. The Portal VPC combines Impero's award winning remote control technology with the Amazon Web Services cloud platform to provide a robust solution for enterprises of any size.

Regions

Portal VPC instances are provisioned in a single AWS region chosen by the customer. A partial listing of the available regions includes:

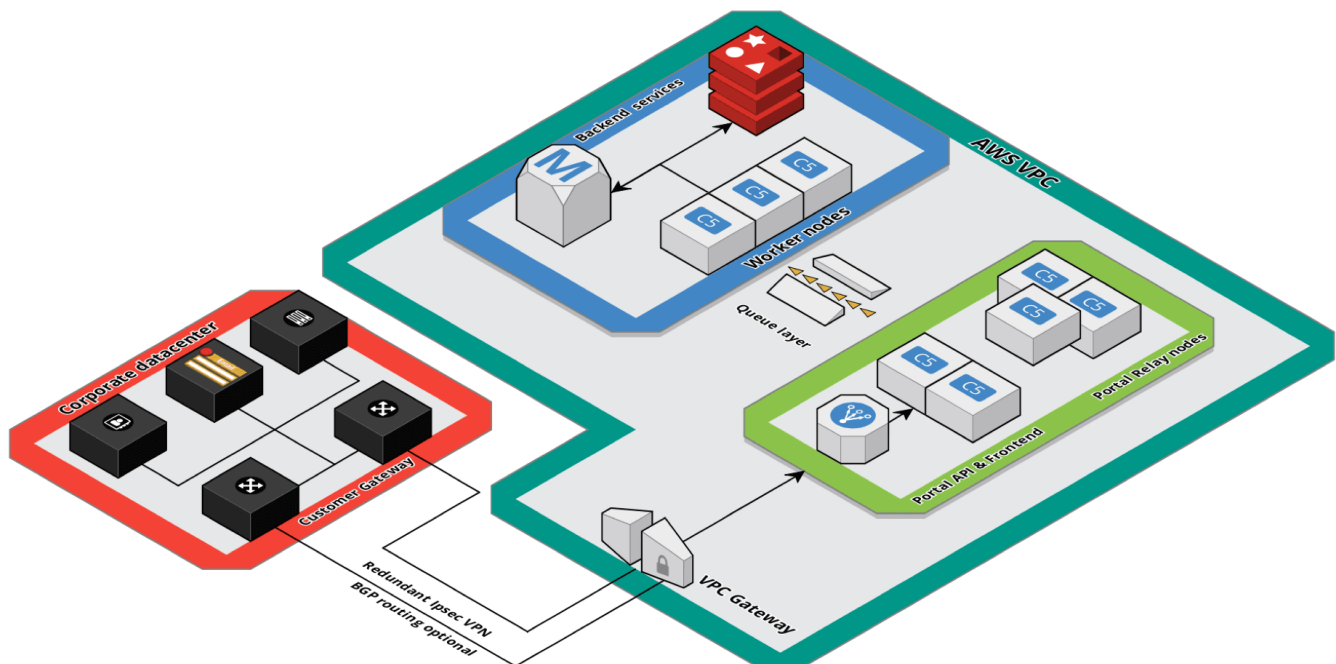

| | |
|-------------------------|--------------------------|
| US East (Ohio) | US East (N. Virginia) |
| US West (N. California) | US West (Oregon) |
| Asia Pacific (Seoul) | Asia Pacific (Singapore) |
| Asia Pacific (Sydney) | Canada (Central) |
| EU (Frankfurt) | EU (Ireland) |

(additional regions available on request)

Options

The Impero Portal VPC can be configured as an extension of your corporate data center with visibility restricted to the users and devices authenticated to your network. Or, the Portal VPC can be opened to the Internet to provide connectivity from anywhere.
