NETOP
Remote Control

Product/version/build:

Windows - version 12.81 (2020034)

Release date:

2nd of March 2020

Introduction

These modification notes contain information relating to the maintenance release of Netop Remote Control 12.81. As a maintenance release, version 12.81 is free for customers with a valid 12.80 license. Information about the 12.80 release and subsequent maintenance releases can be found on the Release History section of the Netop website.

If you have questions about your license or wish to upgrade to Netop Remote Control 12.80, please contact Netop or your local Netop partner for more information.

What's new in Version 12.81 for Windows

In version 12.81 of the **Netop Remote Control Guest** for Windows, the **Recordings** tab is displayed by default in the **Netop Guest** when using the **Portal** license.

Bugfixes

- Fixed a bug where the display settings from the Display tab in the Connection Properties of the Guest module were not saved.
- When you use whitelisting with the **Netop Security Server**, **Netop Host authentication** the **CTRI+ALT+DEL** key combination was disabled in order to avoid the user locking himself out of the remote control session. For more information on how to enable the **CTRL+ALT+DEL** key combination with whitelisting refer to the following Netop KnowledgeBase article.
