

Remote Control

Product/version/build:

Portal

macOS Guest - version 12.83 (2021062)

macOS & Linux Hosts - version 12.83 (2020274)

Release date:

9th of March 2021 (macOS Guest)

5th of October 2020 (macOS & Linux Host)

Introduction

These modification notes contain information relating to the maintenance release of Netop Remote Control 12.83. As a maintenance release, version 12.83 is free for customers with a valid 12.80 license. Information about the 12.80 release and subsequent maintenance releases can be found on the [Release History](#) section of the Netop website.

If you have questions about your license or wish to upgrade to Netop Remote Control 12.80, please [contact Netop](#) or your local Netop partner for more information.

What's new in Version 12.83

- There is a 64-bit Guest running on macOS 10.13 - 10.15. The Guest works as intended with the 32 and 64-bit Hosts. For more information about the technical specifications for the macOS **Guest** and **Host**, refer to the following Knowledge Base [article](#).
- The free trial period is reduced from **30** days to **15** days.

NOTE: The macOS and Linux **Guest** modules do not support the new Connection Manager service of the Netop Remote Control Portal (the Portal Connection Manager serves as a meeting hub for Netop Guests and Hosts and is responsible for managing connections between modules) – contact [Netop Support](#) for more information.
