

Remote Control

Product/version/build:

Portal

Windows - version 12.84 (2021005)

Release date:

January 28, 2021

Introduction

These modification notes contain information relating to the maintenance release of Netop Remote Control 12.84. As a maintenance release, version 12.84 is free for customers with a valid 12.80 license. Information about the 12.80 release and subsequent maintenance releases can be found on the [Release History](#) section of the Netop website.

If you have questions about your license or wish to upgrade to Netop Remote Control 12.80, please [contact Netop](#) or your local Netop partner for more information.

References to the *Netop Remote Control Portal* include:

- the associated services

Security Issue

Working in conjunction with external security researchers, Netop has identified an issue related to the MSI repair process of the Netop installer. This issue affects all supported versions of Netop Remote Control for Windows, including the Guest, Host, Gateway, and Security Server modules. The issue may allow an attacker to elevate permissions inappropriately or disrupt the availability of installed programs.

Exploiting this vulnerability requires a high degree of technical proficiency and no reports have been made of a successful exploit outside a test environment. Nevertheless, **we strongly recommend all users upgrade to the latest version as soon as possible.**

Bugfixes

- Fixed a bug where the **Netop Guest** application would crash when a user clicked on the **Cancel** button in the password prompt of a password protected phonebook file.
