

A holistic view to student safety and wellbeing

Impero Wellbeing provides cloud-based keyword detection tools to capture, record and identify early warning signs of harmful online behavior. Combined with Impero Backdrop’s free digital safeguarding tools, Impero Wellbeing allows schools to manage and record student concerns in online and offline environments from a single, safe and secure interface – creating a holistic view of every student’s wellbeing.

Identify vulnerable students

Created with charitable organizations and nonprofits from around the globe, Wellbeing uses real-time keyword detection and captures to provide school staff with “who, what, when, and why” information about a particular situation.

Key themes include:

- ✓ Bullying
- ✓ Radicalization
- ✓ Eating disorders
- ✓ Illegal content
- ✓ Mental health
- ✓ Suicide and self-harm

Spot early warning signs of harmful behaviour

When paired with other captures and concerns, keyword captures can provide valuable information to identify vulnerable students. Impero Wellbeing provides granular reporting tools to identify areas of concern for an individual student, grade level, school, or district. With full SIS integration, Impero Wellbeing allows schools to analyze trends specific to student characteristics like grade level and gender.

Easy-to-use, secure solution built specifically for schools

Wellbeing keeps student and staff information safe and secure in one central location. Schools can set permission levels for staff, and can view a time-stamped audit log of staff activity for additional security.

Backdrop

A holistic view to every student's wellbeing

Wellbeing is accessed via Impero Backdrop so that online and offline concerns are combined into a single interface. This way, schools can draw any connection between a student's online behavior and their first aid, mental health or behavioral issues.
