

# ContentKeeper for Education

## Web Filtering, Analytics and Ofsted-ready Reporting

### BENEFITS TO LEADERS:

- Real-time Dashboard
- Scheduled Reporting
- KCSiE & Ofsted Ready

### BENEFITS TO TECH STAFF:

- Centralised Policy Management
- Granular Policy Management
- Filter All Devices
- Complete iPad Filtering
- Comprehensive Reporting Tools

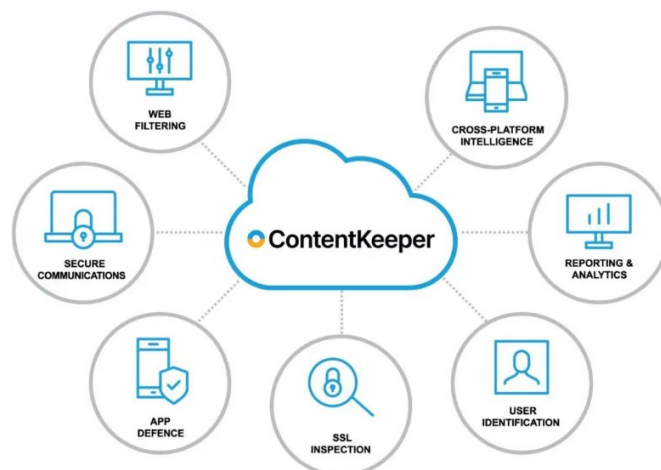

### BENEFITS TO TEACHING:

- Safe Use of Online Resources
- Enable Safe Digital Learning
- User Identification
- Support for BYOD

### New Generation Cloud Filtering Designed for Education

ContentKeeper Cloud is the next evolution of cloud filtering that provides schools, academies and MATs a more seamless and secure way to enable digital and distance learning. ContentKeeper employs centralised management to provide consistent filtering, analytics, and reporting intelligence across all platforms, anytime, anywhere. This includes but is not limited to Chromebooks, Windows, Mac, iPads, smartphones and IoT devices. ContentKeeper integrates the following:

- Live view and analysis of web traffic and user activity
- Comprehensive user identification for age-appropriate policy management
- Granular policy-based domain and sub-domain controls
- Suspicious behaviour monitoring, alerting and reporting
- Intelligent dashboards, in-depth analytics, and comprehensive reporting

### Robust Safety and Security

ContentKeeper provides the level of intelligence required to safeguard students and protect school networks in today's complex learning environment. It combines multiple technologies to eliminate over-blocking and safely allow access to valuable online educational content including:

**1:1 and BYOD Cross-Platform Intelligence** – Ensures accurate identification, policy-based filtering, and reporting across all platforms – anytime, anywhere. Provides centralised management and a consistent filtering experience whether on a school-issued or student owned device.

**Best-in-Class Analytics and Reporting** – Delivers real-time visibility and analysis of network threats and user activity across all devices and browsers. Includes contextual analysis of search terms to prevent potentially life-threatening activity. Intelligent dashboards provide the analytics and comprehensive insight required to improve security and safeguard students. Reports are KCSiE and Ofsted-ready out of the box.

**Filter Circumvention Defence** – ContentKeeper App Defender identifies and blocks over 100 suspicious apps and protocols used to circumvent filters and firewalls.

### 10 Reasons Why ContentKeeper is a Leader in Securing Schools

1. **New Gen Cloud Filtering:** ContentKeeper provides a full-featured cloud filtering solution for schools and trusts that supports all platforms, devices, and web browsers.
2. **Analytics/Reporting:** We provide comprehensive, enterprise-class reporting and analytics to successfully monitor web use, security threats, and student safety. Reports and dashboards are KCSiE and Ofsted-ready, right out of the box.
3. **Complete filtering for iPads:** The unique ContentKeeper architecture enables filtering of the entire iPad, not just through an active app.
4. **All Devices, All Locations, All the Time:** Our technology provides consistent and reliable filtering including Chromebooks, Windows, Mac, iOS, IoT, BYOD, and guest networks. School-managed devices can be filtered inside and outside of the school network.
5. **User Identification:** ContentKeeper seamlessly integrates with popular directory services to ensure age-appropriate policy management including for BYOD traffic. Provides real-time web visibility and accurate reporting across all devices and browsers.
6. **Application Defence:** Our revolutionary signature-based technology allows schools to control unwanted applications used to circumvent filters. Prevents students from anonymously accessing the Dark Web and conducting potentially illegal activities.
7. **Detailed Domain Control:** ContentKeeper provides unmatched granular domain and sub-domain controls across all browsers and devices so schools can stop over-blocking access to popular domains including Vimeo, Google, and YouTube that add value to learning.
8. **YouTube and Vimeo Video Instruction:** ContentKeeper's *Dynamic Safelisting* allows teachers to approve educational videos in real-time eliminating over-blocking of valuable content on YouTube and Vimeo.
9. **Superior Customer Support:** Engineers work with schools and trusts throughout the deployment process, providing training and guidance, to ensure success.
10. **Ransomware Protection:** Our platform provides several malware security tools to help schools and trusts prevent ransomware attacks.
