

# Online Security Threats

Schools face an array of online safeguarding threats posing risks to students on and off premises. These threats increase in diversity and complexity, making it difficult to avoid.

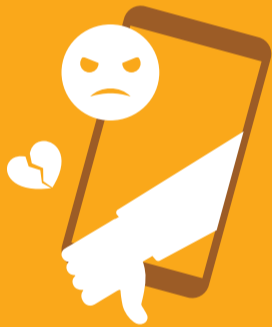

We surveyed over 2,000 students who revealed many have already encountered a host of online safeguarding threats using school owned devices.

**27%** Bypass school web filter using school and personal devices

**37%**

Experienced cyberbullying and other types of harassment.

**20%**
